

Goal: The Instagram grows, more people come to hikes, and all we do is hike hikes every few weeks and make pancakes for people for free (it's donated by someone). We don't have to make content in between or do anything but hike hikes. We can if we want, but we are busy so it's hard. Once it gets cold, we just make content for fun when we want to

Constraints:

- We need to promote hikes via reels
 - High quality reels require a videographer
 - We need to hike the hike before we do it to get content
 - Someone has to edit those videos
- Someone has to set up the partnerships and find time for it
- We have no funding to pay someone

Plan:

Bring on partners (avoid giving away equity) → Get funding → hire videographer or edit → hire other pancake boys → get ai to do outreach to partnerships → only show up for hikes

How do we get funding:

- Selling merch
- Asking for donations
- Partnering with creators/businesses
- Instagram revenue

Merch:

Value Prop: People love what we are doing and we make awesome content. People want to see pancakes in the mountains, it is aesthetically pleasing, and people love doing the hikes with us and getting free pancakes. That means we have a platform to sell merch on, and people have been asking for it. We provide value in creating cool merch with a cool story. Conor is also good at designing merch so it looks lit.

Constraints:

- We need to design epic clothes
- We need a Shopify
- We need a website
- It needs to be priced well

Asking for donations:

Value Prop: We are not doing this for profit and we give away pancakes. People who can get behind what we are doing don't want it to die and would support us if needed.

- We just have to ask
- We don't get enough to pay for much with this

Partnering with creators/businesses:

Value Prop: We are creating a platform with a following. The content is cool to watch and very aesthetic. Clothing or other items would look cooler at the top of a mountain with pancakes. We also get high quality footage. We could also partner with pancake companies, portable grill companies, apps, startups, event hosts, or whatever.

- We need to message LOTS of people on insta and actually create content with them
- We would need to be able to deliver

Instagram Revenue:

Value Prop: Instagram will literally just pay you if you get enough followers and views. We are creating that base and building the page. As we grow, revenue grows naturally.

- We need more content
- Videographer is necessary
- We have to be way more consistent, means we have to film more

Overall goal:

- Outsource anything on that list we don't want to do
